

Emcor Introduces new tool for converting between Rack units (U's) and Inches

To assist our Representatives as well as our customers, Emcor Online has developed and released a tool to convert between Rack units (U's) units and Inches and back again. This tool can be found at <http://www.emcorenclosures.com/uconversion.php> Using the converter is simple, just choose either the number of "U's", or Inches, that you will need and then hit the convert button. The converter does the rest. The drop down menus have been designed to make the process easier by only listing the "U's" in one drop down and the specific Inch measurements that correspond in the other drop down.

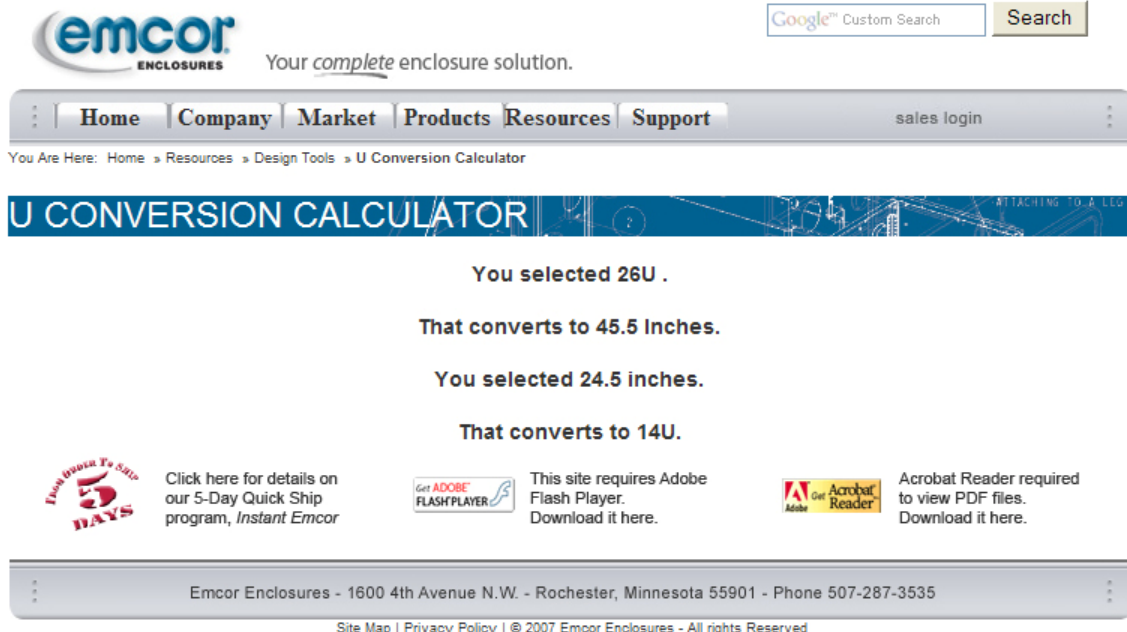

Select the "U" value from the list that you want to convert
Choose ▾

Select the Inches value from the list that you want to convert

Convert

U-converter Interface

No more calculating by hand. You can even convert two measurements at once. The best part is that it is totally free and available anytime. Just go to <http://www.emcorenclosures.com> and click on the resource tab and then on the design tools tab.

emcor
ENCLOSURES Your *complete* enclosure solution.
