### **Why Crenlo**

Whether you are furnishing a 24/7 emergency response control room, computer center, mission critical operations center, a trading floor, or a small operations center, office furniture or similar desking systems are simply not designed to handle the stress of these demanding environments. Our consoles are.

Crenlo ensures conformance to high quality manufacturing standards in all elements of the fabrication process. Manufacturing process controls are utilized from the moment raw material is received and continue through final product assembly and inspection. Dimensional accuracy is statistically audited and verified throughout the cycle with the aid of three state-of-the-art coordinated measuring machines. All products are produced under the internationally recognized ISO 9001 quality assurance program.

## Consoles

We offer the very best in high-end, modular control center consoles. From initial design to final product, our team will work with you to develop a state-of-the-art operation center that meets your specific needs. Years of engineering, product development, and most importantly, client feedback, has resulted in console furniture that offers the ultimate in operator comfort and usability. Select from two products lines that integrate all of today's functional needs while maintaining a visual appeal unparalleled by other computer workstation furniture.

### Our Consoles:

- Are based on a solid steel core to ensure strength and stability for many years.
- Are built to manage large quantities of computer equipment at each workstation.
- Are focused on the ergonomic issues encountered in 24/7 critical operations.
- Have a modular design can adapt with your center's changing needs.
- Ease maintenance by providing special access for equipment & wiring.

Security Application - FP2 product

# FP1

## Emcor® FP1 Product Line

The FP1 console is a unique, flexible and functional solution for your monitoring or surveillance requirements. Available in both 19" and 24" EIA width frame sizes, the console's unique two-tier design allows users to take full advantage of flat panel technology. Combine this with our long standing expertise, competitive pricing and uncompromising customer satisfaction and you have the perfect fit for your needs.

# FP2

## Emcor® FP2 Product Line

The FP2 console allows users to take full advantage of flat panel technology. The open architecture design creates more usable space within a smaller footprint than previous models. Its modular capabilities make it equally suited for single desk surveillance applications or larger scale command and control environments.

# FP1 Components

## Structure

The FP1 console is made up of a combination of base frames and turrets along with wedges. It is finished with a work surface and top cap. Accessories such as articulating monitor arms, power, shelves, drawers, airflow and cable management items can be added per application requirements.

## Paint/Finish

FP1 consoles are finished in textured powder paint. Powder coating provides a durable high-quality finish. Select from one of nine proprietary color options. If needed, we offer air dry touch-up paint in four convenient sizes.

## Turret Area

The turret area is a very functional part of the FP1 console. Mount electronics or items such as book shelves, lockable storage compartments, extension frames and monitor support panels. Keep things cool by mounting a dual fan panel in the rear of the turret.

## Work Surface and Top Cap

The FP1 work surface and top cap are designed for high usage work areas. They are constructed of high-quality laminate bonded to a wood particle board substrate surrounded by a durable black colored edging. Select from the laminate color options below.

# FP2 Components

## Structure

FP2 consoles are created by positioning legs, bays, frames and wedges next to one another to create a desired layout. Bays and frames have a hidden slat wall which is utilized to mount articulating monitor arms and other accessories. The work surface has a contour edge to provide both styling and functionality.

**Work Surface & Leg Insert Foil Options**  
Select from the thermofoil options below.

## Articulating Monitor Arms

Provide for monitor adjustment, increased visibility and efficient use of space.

## Hidden Slat Wall

Easily position, and re-position monitors at any location along the slat wall - even when more than one frame or bay is ganged together.

## Bays and Frames

Bays and frames are finished in a textured black powder paint. Cable pass-throughs between components make managing wires easy. Built in thermal management helps keep sensitive electronics functioning at the proper temperature.

### Frames

Frames are offered in both 19" and 24" panel widths and can be used to mount EIA rack mount electronics or accessories such as sliding shelves or drawers. An intermediate set of mounting rails make mounting items such as power strips easy. Close off the opening with a stylish door.

Vented Rear Access Panel

# Options and Accessories

## Accessories

We offer a variety of additional accessories to tailor a console to specific application needs. Most of the items listed below can be used in either the FP1 or FP2 product lines. For a complete list of available accessories visit our website.

### Shelves and Drawers

Chassis Guides (200 lbs.)  
Fixed Shelf (125-200 lbs.)  
Sliding Shelf (90-112 lbs.)  
Drawer (2U-8U) (90 lbs.)  
Drawer with Lid (90 lbs.)

### Cable Management

Horizontal Lacing Panels  
Horizontal Cable Organizers  
Cable Ingress/Egress Panels  
Velcro and Other Cable Ties

### Air Flow Management

Dual Fan Panels (204 CFM)  
Fan Trays (290-586 CFM)  
Blowers (125-500 CFM)

### Power

Basic, Metered, Monitored, Switched  
15-60 Amp  
120-208 Volt  
Vertical and Horizontal Orientations  
NEMA / IEC / CA Style Plugs and Receptacles

### Grounding

Bus Plate (14 Grounding Holes)  
Bus Bar (12U-45U)  
Ground Studs

### Lighting

Rack-mount or Panel-mount Style  
LED and Halogen Bulbs  
12" and 18" Gooseneck Lengths  
Bases for conversion to task lighting

**Our Commitment**

Crenlo's objective is to define our customer's quality requirements, and to produce products and services that meet or exceed those expectations. Crenlo is committed to continuous improvement through education, process advancements and problem prevention.

# Emcor Product Portfolio

## Emcor® Enclosures

This standard product lineup includes a range of vertical racks and cabinets, which can be configured or modified with numerous accessories and sizes to meet your diverse needs.
