

Emcor[®] 10 Series[®] Product Catalog

www.emcorenclosures.com | 507-287-3535

Our objective is to define our customer's quality requirements, and to produce products and services that meet or exceed those expectations. We are committed to continuous improvement through education, process advancements and problem prevention.

Engineering Drawings

The dimensional drawings that are shown on the following pages are for reference only. Detailed engineering drawings are available upon request and are subject to change without notice.

Emcor® 10 Series® Product Line

10 Series® is an extremely heavy-duty product line capable of handling 3,500 lbs. It is a configure-to-order product allowing users to select from a variety of standard components to build exactly what is required for their specific application. The entire product will ship as configured so there is no assembly required. Modified or custom designs are available by contacting your local sales representative or us directly.

Platinum Delivery Program

Get your product shipped one – or even two – weeks faster than normal lead times, for a nominal fee. Ask for either the Platinum or Diamond option with your quote.

- Side Panels 82-88
- Hardware 89-90
- Ordering Guide 92-105

How to Order

Emcor Enclosures are configure to order, meaning each component of the enclosure is ordered separately. This process allows the most versatility in the final appearance and function of the enclosure or console. Simply follow the steps listed below.

1 DETERMINE THE FRAME PART NUMBER

Because the basic building block is the frame it will be your first selection.

2 REVIEW THE ORDERING GUIDE (LOCATED IN THE BACK OF THE CATALOG)

Once you have selected a frame part number, locate it in the ordering guide. Note that the ordering guide is organized so that compatible accessories are listed to the right of the frame part numbers.

3 ISSUE ORDERS TO

All correspondence and PO's should be addressed to:

Emcor Enclosures
2900 37th St. NW, Bldg. 003
Rochester, MN 55901

Submit the Purchase Order (PO) to the Sales Representative indicated on the quote.
Be sure to include a copy of the quote.

Paint

Paint/Finish

Our products are finished in textured powder paint. Powder coating provides a durable high-quality finish. Select from one of nine proprietary color options. Sample kits are available upon request.

Part Numbers

Color	
White	TX-WHP
Neutral	TX-NUP
Graystone	TX-GSP
Caribbean Blue	TX-CRBP
Fawn	TX-FNP
Steel	TX-STP
Putty	TX-PTP
Black	TX-BKP
Hi-Tech Gray	TX-HTGP

Custom Paint/Finish

Custom paint colors or finishes can be accommodated. Please contact us with your requirement. Additional charges may apply.

Touch Up Paint Pens

We offer our proprietary paint colors in a Paint Pen.

Part Numbers

Color	Paint Pen
White	PEN-WH
Neutral	PEN-NU
Graystone	PEN-GS
Caribbean Blue	PEN-CRB
Fawn	PEN-FN
Steel	PEN-ST
Putty	PEN-PT
Black	PEN-BK
Hi-Tech Gray	PEN-HTG

Modifications and Customizations

In many instances, the customer can best be served by tailoring the enclosure to their individual specifications. Below is a sampling of the most common modifications.

Overall Foot-print

The chart below shows typical ranges to which this product line can be modified in terms of usable height, depth and width. Standard* sizes are indicated.

U's Inches	1U 1.75	3U 5.25	5U 8.75	7U 12.25	9U 15.75	11U 19.25	13U 22.75	15U 26.25	17U 29.75	19U 33.25	21U 36.75	23U 40.25	25U 43.75	27U 47.25	29U 50.75	31U 54.25	33U 57.75	35U 61.25	37U 64.75	39U 68.25	41U 71.75	43U 75.25	45U 78.75	47U 82.25	49U 85.75		
Usable Height								15U	19U 20U	23U				28U		30U		35U 36U		40U	42U		45U		48U		to 54U
Overall Depth								26.312	31.562	36.875	42.125	47.375															
Overall Width								22.562	27.562																		

*Modifications to the standard foot-print may affect static load ratings, center of gravity and other performance.

Strut Locations:

Struts can be relocated to meet specific customer application needs.

Cut-Outs & Holes:

Cut-outs and holes are available in multiple sizes, shapes and locations on doors, panels, and some frames.

Multiple Doors:

Cabinets can accept multiple doors to segregate / secure select components inside.

Casters:

Specialty casters can accommodate heavy loads, terrains and shock absorption needs.

Ground Studs:

Ground studs may be placed in any location, as needed.

Assembly / Wiring:

Pre-assembly or pre-wiring can be performed during the manufacturing process.

Paint / Decals:

Custom color, texture, ink stamping or silk screen can be applied or incorporated as necessary.

Cable Management:

Wire management accessories can be designed or procured to ease integration and wiring.

Service Panels:

Additional panels can be added to complement customer's routine service needs.

Frames

Frame Overview

The following types and sizes of frames are available. Dimensions are overall.

Vertical Frames

2 Widths	22.562" (19" EIA Rack Width)
	27.562" (24" EIA Rack Width)
5 Depths	26.312" (26)
	31.562" (31)
	36.875" (36)
	42.125" (42)
	47.375" (47)
12 Heights	29.875" (15U Usable Rack Space)
	36.875" (19U Usable Rack Space)
	38.625" (20U Usable Rack Space)
	43.875" (23U Usable Rack Space)
	52.625" (28U Usable Rack Space)
	56.125" (30U Usable Rack Space)
	64.875" (35U Usable Rack Space)
	66.625" (36U Usable Rack Space)
	73.625" (40U Usable Rack Space)
	77.125" (42U Usable Rack Space)
	82.375" (45U Usable Rack Space)
	87.625" (48U Usable Rack Space)

Wedge frames available.

-WT Style Vertical Frames

2 Widths	22.562" (19" EIA Rack Width)
	27.562" (24" EIA Rack Width)
3 Depths	26.312" (26)
	31.562" (31)
	36.875" (36)

	24.089" (12U Usable Rack Space)

Wedge frames available.

45° Turrets

2 Widths	22.562" (19" EIA Rack Width)
	27.562" (24" EIA Rack Width)
4 Depths	13.970" (4U & 3U Usable Rack Space)
	17.470" (6U & 3U Usable Rack Space)
	20.970" (8U & 3U Usable Rack Space)
	24.470" (10U & 3U Usable Rack Space)

90° Turrets

2 Widths	22.562" (19" EIA Rack Width)
	27.562" (24" EIA Rack Width)
2 Depths	8.750" (4U & 2U Usable Rack Space)
	12.250" (6U & 2U Usable Rack Space)

3500 lb. Static Load Capacity

10 Series frames are fully welded and can handle 3,500 lbs. of equipment evenly distributed in the frame.

- 14-gauge steel - Crosstie
- 14-gauge steel - Frame Channel
- 11-gauge steel - Gussets
- 16-gauge steel - Other Components

Frame Joining Hardware (sold separately)

Extra Mounting Hardware (sold separately)

Part Number

XTDK-IBC

Seismic Tie Down Kit (IBC)

10 Series® frames can be adapted to withstand the seismically induced vibrations of earthquake activity. With the addition of a seismic tie down kit, these enclosures meet International Building Code (IBC) guidelines for non-essential buildings. For more information and test results visit our website.

15U Vertical Frames

15U Vertical Frames

These vertical frames allow for mounting of standard EIA electronic components. They can be used as a stand alone frame, joined together in a row, or used in combination with wedge frames. Accessories such as shelves, drawers, power, and cable managers can be added per application requirements. The use of a work surface in conjunction with this frame is not recommended. There are purpose built frames with the proper provisions for mounting a work surface available.

14U “Desk Height” Vertical Frames with Work Surface Mounting Provisions

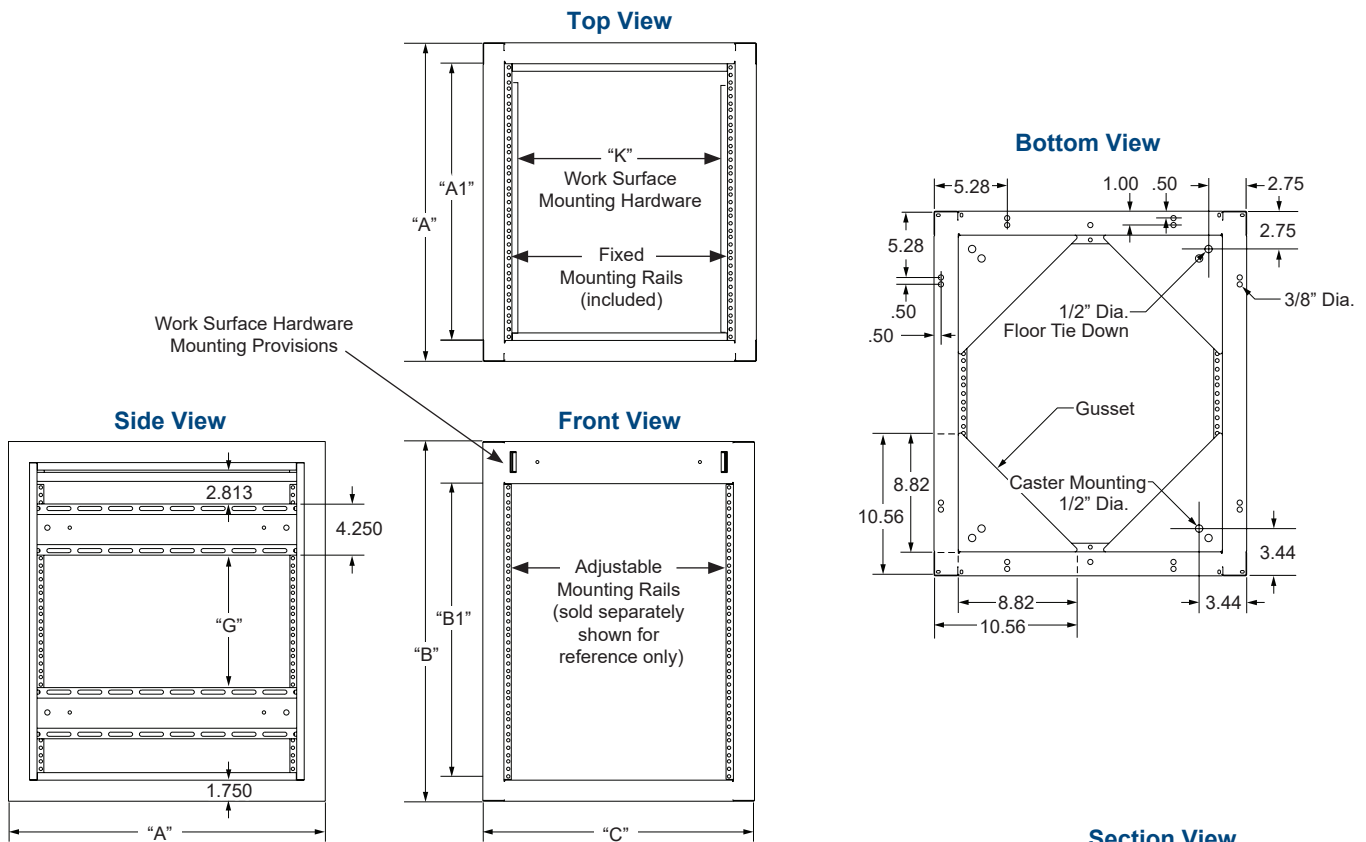

14U “Desk Height” Vertical Frames with Work Surface Mounting Provisions

These vertical frames allow for mounting of standard EIA electronic components and include work surface mounting hardware provisions. They can be used individually, joined together in a row (joining hardware included), or used in combination with wedge frames to create “desk height” work station configurations. Accessories such as shelves, drawers, power, and cable managers can be added per application requirements. Don’t forget the work surface, which is sold separately.

Slope Front Frames (12U Slope Opening)

Slope Front Frames with a 12U Slope Opening

Slope front frames allow for mounting of standard EIA electronic components, controls, or interface equipment. They can be used as a stand alone frame, joined together in a row (joining hardware included), or used in combination with wedge frames. Accessories such as shelves, drawers, power, and cable managers can be added per application requirements. The use of a work surface in conjunction with this frame is not recommended. There are purpose built frames with the proper provisions for mounting a work surface available.

Mounting Rails

Mounting Rails

Choose from three styles of mounting rails. "Round/Round".281" diameter round holes on both flanges of the mounting rail, "Tapped/Round".159" diameter tapped holes (10-32 NF2) on the front flange, and .281" diameter round holes on the side flange of the mounting rail, or "Tapped/Tapped".159" diameter tapped holes (10-32 NF2) on both flanges of the mounting rail. The rails are processed to specification ASTM-B633 which calls for electro-deposited zinc plating with a clear chromate conversion coating.

Square Hole/Dell® Mounting Rails

These mounting rails allow Dell® rack mountable components to be installed in all 10 Series® frames. Hole to hole spacing is EIA standard. These rails do not have a side flange. Only front flange mount accessories can be mounted to this item.

Mounting Straps

Mounting straps are used when there is a mix of different depth accessories in a frame. Straps allow full depth items that require a rear attach point to pass by the strap and attach to the rail behind it. The straps are processed to specification ASTM-B633 which calls for electro-deposited zinc plating with a clear chromate conversion coating and include rack unit markings. Only accessories that are side mount style can be mounted to a strap.

Rail to Rail Settings

The rear mounting rails inside of a frame can be positioned in multiple locations, or multiple sets of rails may be used. The following images indicate standard rail locations that will allow Emcor components to be properly positioned based on frame depth.

Short Depth Equipment

When full height items are mounted in the rear of a frame and internal components such as fixed equipment shelves, chassis guides, work surface drawers, pull out shelves, and work surface hardware is also required, these items must be ordered in a shorter depth so as not to interfere with the full height item. In most cases an extra pair of mounting rails or straps will need to be ordered to facilitate mounting of the shorter depth items. Refer to the example below.

Example

A customer requests a frame that has a 19" panel width, a depth of 31.562" and 40U of usable rack space. (XFR-317019) The customer requires a power strip and a bus bar, as well as a pull out shelf in the enclosure. What do you do?

Simply order a shorter depth shelf and an extra pair of mounting rails or straps.

In this case you would order:

- XCSQ-2619 - solid pull out shelf
- XMS-70 - extra pair mounting straps

Panel Width Reducers

Panel Width Adapter Kits and Optional Filler Panels

Panel width adapter kits provide a means of reducing the entire panel width from 24" to 19" adding approximately 2.5" of available space between the frame and rails on each side of the frame. Order one kit per pair of rails. If both the front and rear openings are to be reduced, then two of the appropriate kits must be ordered. The appropriate kit to be specified is determined by the number of struts on the frame.

Optional Filler Panels

Add optional filler panel to close off the 2.5" wide opening between the frame and mounting rails. Closing off the opening aids in airflow management. It also provides a finished appearance. Sold as pairs, the filler panels are a painted item.

Note

Kit does not include the mounting rails, they are shown for reference only. Optional cover panels sold as pairs.

Panel Width Adapter Brackets

Adapter Brackets provide a means of reducing portions of the panel width from 24" to 19" while maintaining a finished appearance. If the equipment that is being mounted to the brackets has adequate rear supports within the frame the recommended load rating is 300 pounds. The recommended load rating for equipment that is front mounted is 150 pounds.

Riser Base (Pontoon Base)

Riser Base (Pontoon Base)

A Riser is a versatile base that can be used in many ways including: as a toe kick, as storage space for extra bundles of cables, to mount casters, or flipped over and used for floor tie down applications. It is recessed .50" at the front of the frame. Risers are mounted at the factory.

Anti-tip/Caster Dolly Base

Anti-tip/Caster Dolly

This base is most commonly used for anti-tip requirements. The base mounts flush to sides of the frame which it is mounted to. It is designed to overhang the depth of the frame 12 inches. Casters are required and sold separately.

Anti-tip/Caster Dolly Base
[11-gauge steel]

Castors for Anti-tip / Caster Dolly

Choose from rigid or swivel casters. The casters (which must be ordered separately) are positioned by the outer edge of the base at each corner. The base is notched so the locking mechanism on the locking casters -if used- can be accessed keeping the enclosure firmly in place when activated.

Wedge Frames for use with Vertical Style Frames

Vertical Wedge Frames

Vertical wedge frames, referred to as “flat pack wedge kits” due to the way they ship, can be used with vertical frames to create console or work station configurations. Vertical wedge frames come with the hardware necessary to bolt to the side of vertical frames. The height and depth of both the vertical frame and the wedge frame must be the same to be compatible.

Wedge Frames for use with Slope Front Style Frames

Slope Front Wedge Frames

Slope front wedge frames can be used with slope front frames to create console or work station configurations. Slope front wedge frames come with the hardware necessary to bolt to the side of slope front frames. The height and depth of both the slope front frame and the wedge frame must be the same to be compatible. Slope front wedge frames are of fully welded with solid non-removable front, top, and rear panels.

45° Turret Frames

Turret – 45°

Turret frames assist in providing proper viewing angles of electronic equipment and instrumentation. Turret frames are supplied with welded in-place mounting rails. Only front flange mounting accessories can be mounted inside of Turret frames. 30° & 45° wedge shaped turrets are available by contacting the factory. Includes a kit with joining hardware and rubber bumpers to avoid abrasion when joining.

Spring Clip Detail

Mounting

Spring clips are included with each 18" and 48" vertical unit. Attach the spring clips to the strut, making sure the top clip is no more than one inch from the top of the unit. Once the spring clips are secure, snap the PDU into position. Stand off brackets are included.

Standard Mounting Detail

Mounting Detail Using Stand-off Bracket

Grounding

Bus Bars

Insulated copper bus bars attach to the top flange of the upper and lower frame struts. The bus bar is supplied with #10-32 tapped holes on 3.5" centers. **Only full height bus bars will mount to frames. Short height bus bars will not align with frame mounting struts.**

Mounting Detail

Note

When equipment support items such as shelving or drawers are being mounted in the same frame as a bus bar, the items must be ordered short depth.

Ground Bus Plate

Ground bus plates provide equipment grounding capabilities that are unique when compared to the full length bus bars. The copper ground bus plate provides fourteen (14) #10-32 tapped grounding points and mounts directly to the frame strut in a vertical or horizontal position. The designed-in mounting flexibility allows for attachment of the ground bus plate in locations that are much less likely to interfere with full depth internal frame equipment and accessories such as mounting brackets, equipment shelves, chassis guides and others.

CMH-1U-24-T	1.750	1U

Cable Organizer with 5 D Rings

A simple and convenient method of organizing cabling. Accepts accessory style C.

Part Number

19" EIA Width	"B1" # of Rack Units Used	
CMH-1U-19	1.750	1U

DIN Rail

Rail is 35mm DIN type 3. 8.5" of front-to-rear adjustment. Accepts accessory style C.

Part Numbers

19" EIA Width	"B1" # of Rack Units Used	
CMH-2U-19-DIN	3.500	2U

24" EIA Width	"B1" # of Rack Units Used	
CMH-2U-24-DIN	3.500	2U

Lacing Panels

A simple and convenient method of organizing cabling. Accepts accessory style A or C.

Part Numbers

19" EIA Width	"B1" # of Rack Units Used	
CMH-1U-19-LP1	1.750	1U
CMH-2U-19-LP2	3.500	2U

Lighting

Racklights

Racklights provide illumination for an entire rack of electronic equipment and enable the user to adjust illumination for patching or general rack service. Available in both 5-Watt halogen or low intensity LED, the racklights only occupy 1U of rack space. All racklights include 12-Volt power supply and mounting hardware.

Part Number

ELIGHT RL-10-S

1U rack mount panel with one 12" high intensity (5-Watt halogen) gooseneck permanently attached. The gooseneck is recessed into the panel for transport and is controlled by a dimmer switch. Includes 12-Volt power supply with 6ft. cord and 5-Watt halogen bulb.

Part Number

ELIGHT RL-10-S-LED

1U rack mount panel with one 12" low intensity LED gooseneck permanently attached. The gooseneck is recessed into the panel for transport. A three-way rotary switch enables the user to toggle between white light and red light output. Includes 12-Volt power supply with 6ft. cord.

Part Number

ELIGHT RL-10-D

1U rack mount panel with two 12" high intensity (5-Watt halogen) gooseneck permanently attached. The goosenecks are recessed into the panel for transport and are controlled by dimmer switches. Includes 12-Volt power supply with 6ft. cord and 5-Watt halogen bulb.

Part Number

ELIGHT RL-10-D-LED

1U rack mount panel with two 12" low intensity LED gooseneck permanently attached. The goosenecks are recessed into the panel for transport. A three-way rotary switch enables the user to toggle between white light and red light output. Includes 12-Volt power supply with 6ft. cord.

Build Your Own Racklight

Part Number

ELIGHT RLX

1U rack mount panel with two 3-pin XLR connectors for use with 3-pin goosenecks. Includes 12-Volt power supply with 6ft. cord. Gooseneck(s) sold separately.

Part Number

ELIGHT 12X-HI

12" high intensity (5-Watt halogen) gooseneck for use with any standard 3-pin XLR connector.

Part Number

ELIGHT 18X-HI

18" high intensity (5-Watt halogen) gooseneck for use with any standard 3-pin XLR connector.

Part Number

ELIGHT 12X-LED

12" low intensity LED gooseneck with 3-pin XLR connector. Light output is white.

Part Number

ELIGHT 18X-LED

18" low intensity LED gooseneck with 3-pin XLR connector. Light output is white.

Lampsets

Lampsets shed light exactly where you need it. Lampsets are available with 12" or 18" gooseneck lengths and include bulb, chassis and fully adjustable dimmer. Each lampset includes a 12-Volt power supply, a snap mount set^(SM) for easy removable mounting and screws for permanent mounting.

Part Number

ELIGHT L-3/12

High intensity (5-Watt halogen) lampset with a 12" gooseneck permanently attached. The gooseneck is controlled by a dimmer switch. Includes 12-Volt power supply with 6ft. cord and 5-Watt halogen bulb.

Part Number

ELIGHT L-3/18

High intensity (5-Watt halogen) lampset with an 18" gooseneck permanently attached. The gooseneck is controlled by a dimmer switch. Includes 12-Volt power supply with 6ft. cord and 5-Watt halogen bulb.

Part Number

ELIGHT RAKIT

This bracket allows you to mount a lampset to your rack without using any rack space. The bracket spans a 3U rack space and will not interfere with rack mounted equipment controls.

Part Number

ELIGHT L-12-LED

Low intensity LED lampset with a 12" gooseneck permanently attached. A three-way rotary switch enables user to toggle between white light and red light output. Includes 12-Volt power supply with 6ft. cord.

Part Number

ELIGHT L-18-LED

Low-intensity LED lampset with an 18" gooseneck permanently attached. A three-way rotary switch enables the user to toggle between white light and red light output. Includes 12-Volt power supply with 6ft. cord.

Part Number

ELIGHT CWB

Turn your lampset into a desk light with a Cast Weighted Base. This design features four rubber feet for maximum stability.

General Accessories

Use these accessories with either Racklights or Lampsets

Part Number

ELIGHT WYE

This splitter cable connects multiple goosenecks to a single power supply.

Use WYE with halogen lights.

Part Number

ELIGHT PYE

This splitter cable connects multiple goosenecks to a single power supply.

Use PYE with LED lights.

Part Number

ELIGHT Q5

5-Watt halogen replacement bulb.

Light Duty Shelf

Light Duty Shelf

Light Duty shelves provide an easy method of storing non-rack mount style equipment in a frame. The shelf attaches to the front flange of the mounting rails and require no rear attachment point. An adjustable backstop is provided for alignment.

- Load capacity: 50-lbs. evenly distributed.

Note

The bottom flange of this shelf intrudes .750" on the rack space below. Items that take up internal space cannot be mounted directly below this shelf.

Part Numbers

19" EIA Width		"A1" Shelf Depth	"B1" # of Rack Units Used

Book Shelf
[16-gauge steel]

Light Duty Locking Drawer

The light duty locking drawer is perfect for applications where securely storing small items is required. The drawer attaches to the front flange of the mounting rails and require no rear attachment point. It is finished in a black powder coat paint. This drawer is keyed differently than doors/side panels.

- Load capacity: 20-lbs. evenly distributed.
- Drawer extension: 11.77" from front of the enclosure.

Part Numbers

19" EIA Width	"A1" Drawer Depth	"B1" # of Rack Units Used
LKD-0319	13.320	3.500 2U

Light Duty Locking Drawer
[16-gauge steel]

1U Sliding Shelf

1U Sliding Shelf

Sliding shelves make it possible to slide equipment in and out of the enclosure for fast, easy accessibility. Heavy-duty ball bearing slides allow for ease of movement and feature a lock open option. The shelf can be flipped over and used as a tray if desired and comes with captive fasteners to lock the tray in the closed position. The vents aid in air flow management and are sized for #10 hardware. The 1U sliding shelf comes in a black power coat.

- SHS-1U-20 load capacity: 112-lbs. evenly distributed.
- SHS-1U-28 load capacity: 90-lbs. evenly distributed.

Part Numbers

19" EIA Width			
Vented	"A1" Shelf Depth	"B1" # of Rack Units Used	Telescoping Min/Max Depth
SHS-1U-20	20.000	1.750	1U 22.000" - 26.000"
SHS-1U-28	28.000	1.750	1U 26.000" - 34.000"

1U Sliding Shelf
[14-gauge steel]

Rail to Rail Settings (mounts to rails only)

This item requires both a front and rear attach point. Since the rear rails inside of a frame can be positioned in multiple locations, or multiple sets of rails may be used, be to double check that the telescoping Max/Min depth is within the constraints of your rail settings.

1U Fixed Adjustable Depth Shelf

Why lock your rail settings, as determined by the depth of the shelf? This shelf has telescopic rear mount for increased versatility, while providing the stability of 4-point mounting. The side lip prevents item or equipment from sliding off the shelf. Vents aid in airflow management. The shelf comes in black powder coat finish.

- Load capacity: 250-lbs. evenly distributed.

Part Numbers

19" EIA Width		
Vented	"B1" # of Rack Units Used	Telescoping Min/Max Depth
SHF-1U-22-36	1.750 1U	22.000" - 36.000"

1U Fixed Shelf
[14-gauge steel]

Rail to Rail Settings (mounts to rails only)

This item requires both a front and rear attach point. Since the rear rails inside of a frame can be positioned in multiple locations, or multiple sets of rails may be used, be to double check that the telescoping Max/Min depth is within the constraints of your rail settings.

Retractable Keyboard Tray

Retractable Keyboard Tray

Retractable keyboard trays provide the flexibility to incorporate a full size keyboard within a 19" EIA width frame. The keyboard tray is housed within the enclosure in a "front-to-rear" orientation. To access the keyboard, simply pull the tray outward until it locks into the open position. The keyboard tray can then be rotated 90° and affixed into position for operator use. A low profile mouse pad is incorporated onto the front of the tray across its entire width. In order to stow the keyboard back into the enclosure, rotate the tray 90°, unlatch the locking slide, and retract the tray back into the frame.

Part Number

19" EIA Width	"B1" # of Rack Units Used		Telescoping Min/Max Depth
RKT-0319-S	3.500	2U	17.000" - 30.375"

Optional Hinged Access Panel

An optional hinged access panel is available for those users that wish to close off the 2U opening when the keyboard is stowed.

Part Number

KTAP-0319

Keyboard Tray

Access Panel
[mounts directly to tray]

Rail to Rail Settings (mounts to rails only)

This item requires both a front and rear attach point. Since the rear rails inside of a frame can be positioned in multiple locations, or multiple sets of rails may be used, be to double check that the telescoping Max/Min depth is within the constraints of your rail settings.

Heavy Duty Chassis Guides

Heavy Duty Chassis guides (sold as pairs) are used to support heavy equipment by means of angular steel support members, leaving the bottom of the mounted equipment exposed for cooling or servicing. Chassis guides are mounted flange side down, unless otherwise specified.

- Load capacity: 200-lbs. evenly distributed.

Note

Due to the thickness of the material, chassis guides interfere .125" on both the rack space above and below where this item is mounted. Items that take up internal space cannot be mounted directly above or below chassis guides.

Part Numbers

Drawer with Lid

These drawers can be used for storing equipment which requires easy access, or as a pull-out writing shelf. Heavy-duty ball bearing slides allow for ease of movement and have a quick disconnect feature. Both paint and laminate color selection is necessary at time of order placement.

- Load capacity: 90-lbs. evenly distributed.
- Drawer extension: 17" from front of the enclosure.

Rail to Rail Settings (mounts to rails or straps - not square hole rails)

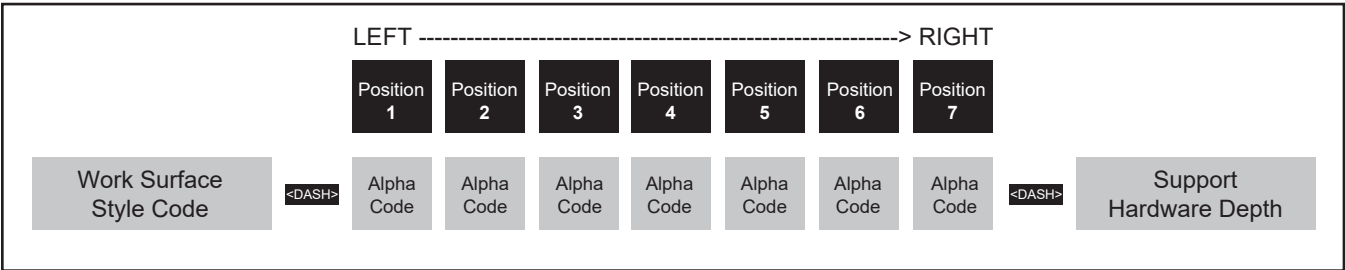

This item requires both a front and rear attach point. Since the rear rails inside of a frame can be positioned in multiple locations, or multiple sets of rails may be used, be sure to select the proper part number based on the rail settings. The following image indicates standard rail locations that will allow this item to be properly positioned.

Work Surfaces

The following procedure allows the most common work surface to be configured without vendor or factory assistance.

- Begin by determining which work surface style is to be ordered
- Insert the appropriate work surface style code.
- <DASH>
- Beginning in the left position of the configuration and continuing to the right, insert the appropriate alpha code.
- <DASH>
- Insert the depth of the support hardware needed.

Work Surface Style Code Options	Configuration Alpha Code Options	*Rail to Rail Settings
XWSL = laminate edge XWST = t edge XWSB = bull nose edge XWSO = oak edge	A = 19" panel width frame C = 24" panel width frame G = 30° wedge (slope front) H = 45° wedge (slope front) J = 30° wedge (vertical front) K = 45° wedge (vertical front)	20 = 20.062 (A) 26 = 25.125 (B) 31 = 30.375 (C) 36 = 35.625 (D)

Laminate

The following laminate colors are available for the XWSL, XWST, XWSB and XWSO work surface styles. Sample kits are available.

Part Numbers

260	Warm Cherry
258	Vintage Oak
259	Butternut
250	Antique White

263	Birch
252	Sandstone

Static Dissipative Laminate

Static dissipative laminate available upon request.
Ask about color availability and lead time.

Corian®

The ultimate in seamless elegance and durability, Corian solid surface writing surfaces are available in a wide range of patterns and colors. Some installations may require a local licensed Corian® contractor to finalize the install. Contact the factory for layout, edge style, lead time and pricing.

*Rail to Rail Settings

This item requires both a front and rear attach point. Since the rear rails inside of a frame can be positioned in multiple locations, or multiple sets of rails may be used, be sure to select the proper part number based on the rail settings. The following image indicates standard rail locations that will allow this item to be properly positioned.

XWSL: Laminate Edge

Section View

One-piece laminated writing surface constructed of high quality plastic laminate bonded to a substrate of wood particle board. Rounded front corners provide a clean and aesthetically pleasing user interface.

XWST: T-edge

Section View

Designed for high usage work areas, this writing surface style includes edge molding that adds durability and beauty to your work surface. The black colored edging is permanently adhered to the front and sides of the writing surface. The writing surface is constructed of high-quality laminate bonded to a wood particle board substrate.

XWSB: Bull Nose Edge

Section View

This style writing surface combines a laminated top surface with hardwood sides and rubber front edge. The wood sides are painted black to match the front rubber edging. The combination of wood, laminate, and edging provides a pleasing contrast of materials and textures. The edging is semi-soft to touch and textured finish.

XWSO: Oak Edge

Section View

One-piece laminated writing surface constructed of high quality plastic laminate bonded to a substrate of wood particle board. Front rounded edges and sides are real oak, providing a rich appearance.

Articulating Monitor Arms

Step 1: Choose the Monitor Set-Up

Select from horizontal or vertical monitor set-ups with up to four monitors on one pole.

Horizontal Set-Ups

Choose from set-ups with one, two, or three monitors aligned horizontally. Each arm configuration comes with an 18" tall pole that fits into the base options available.

1 Monitor Set-Up

2 Monitor Set-Up

3 Monitor Set-Up

Vertical Set-Ups

Choose from set-ups with two or four monitors aligned vertically. Each arm configuration comes with a 24" tall pole that fits into the base options available.

2 Monitor Set-Up

4 Monitor Set-Up

Step 2: Choose the Mounting Base

Select from three mounting options. These bases allow the Articulating Monitor Arms to be mounted on a work surface or to the frame.

Step 3: Choose the Arm Style

Select from arms that allow horizontal or both horizontal and vertical movement.

Straight Link Style Articulating Monitor Arms

Straight link style arms allow for horizontal monitor movement. The arms allow the user to adjust the monitor left or right as needed. At the end of each arm is a ball joint, allowing the tilt of the monitor to be adjusted as well.

Dynamic Link Style Articulating Monitor Arms

Dynamic link style arms allow for both horizontal and vertical monitor adjustment via the use of extension spring technology located on the second link of the arm. At the end of each arm is a ball joint, allowing the tilt of the monitor to be adjusted as well.

VESA Mounting Plates

Every arm comes with two VESA mounting plates sized 100mm and 75mm. These will accommodate most monitors.

Mounting Base Options for Articulating Arms

The following base options can be used in conjunction with a work surface or frame to mount an articulating arm to. These base options accept monitor arm configuration that come with a pole. All mounting hardware is included.

Part Number

HS-B-C

Clamp Style Mount

NOTE: This mount requires a square edge to clamp to.

Part Number

HS-B-G

Grommet Style Mount

NOTE: This mount requires a grommet hole to be drilled in the work surface.

Part Number

MFBASE-F

Frame Style Mount

NOTE: This mount requires the frame to be drilled

Heavy Duty Mount - All In One

The following option can be used to support monitors weighing up to 25 lbs. This set-up includes the Grommet style mount and does not require a mount to be ordered separately.

1 Monitor Set-Up

Part Number

HS-G1-AD-M8

Straight Link Style Articulating Arms

Straight Link Style Articulating Monitor Arms

Straight link style arms allow the user to adjust the monitor left or right as needed. At the end of each arm is a ball joint, allowing the tilt of the monitor to be adjusted as well. The monitor arms are free of harmful Red List chemicals and include a built-in Counterbalance Indicator allowing the installer to counterbalance the monitor weight without a monitor. Each arm is black in color and can support one monitor weighing up to 15 lbs. Mounting base sold separately.

3 Monitor | Horizontal Set-Up

Part Number

1 Monitor and Keyboard | Horizontal Set-Up

Part Number
HS-P1-AD

Part Number
HS-P1-S8D-K

Note: This set-up utilizes an angled first link.
Commonly used in conjunction with a keyboard.

2 Monitor | Vertical Set-Up

Part Number
HS-P2V-S12D-AD

4 Monitor | Vertical Set-Up

Part Number
HS-P4-S12D-AD

Dual Fan Panels

Dual Fan Panel

Dual fan panels are designed to mount in the front, rear, and top panel openings and are primarily used to help protect rack-mount equipment from overheating, performance issues, and shortened lifespan.

- 115 Volt AC power or 230 Volt AC Power.
- Fan Motors are UL component recognized; CSA certified.
- Fan size: 4.625" square x 1.5" deep.
- Operating temperature range: -4°F to +158°F.

Part Numbers

19" EIA Width									
	Airflow	# of Fans	CFM	Watts	Volts	dBA	"B1" # of Rack Units Used		Plug

XPN-0524-FP-2E-220	Exhaust	2	204	40	230	43	5.250	3U	no

Air delivery based on operating at 60 HZ, single phase power.

Note:

115 Volt includes a 6' power cord with molded 5-15P plug.
230 Volt has no plug.

Note

If the fans are set to **intake** cooler air they should be positioned near the bottom of the rack.

If the fans are set to **exhaust** out heated air they should be positioned near the top of the rack.

Thermostatically Controlled Rack Fan Panels

Thermostatically Controlled Rack Fan Panels

Thermostatically controlled rack fans panels are designed to mount in the front or rear panel openings and are primarily used to help protect rack-mount equipment from overheating, performance issues, and shortened lifespan.

- 115 Volt AC power.
- Operating temperature range: 14°F to 230°F.
- Programmable thermostat controller with automated speed control, alarm warnings, and backup memory.
- PWM-controlled motor features precise speed control, reduced rotor noise, and runs on energy efficient DC voltage.
- Fan Motors are UL component recognized; CSA certified.
- Fans contain long-life ball bearings rated at 67,000 hours and are certified by CE, UL, and RoHS.
- Corded precision sensor probe constructed of stainless steel.
- Supplied with a 72" 18/3 SJT power cord with a NEMA 5-15P plug.
- Each unit contains a DC connector port which can be used to control another rack fan.

Note

If the fans are set to **intake** cooler air they should be positioned near the bottom of the rack.

If the fans are set to **exhaust** out heated air they should be positioned near the top of the rack.

Fan Trays

Fan Trays

Fan trays mount to the front flange of the mounting rails and are primarily used for spot cooling within a frame.

- 115 Volt and 230 Volt AC power options.
- Fan Motors are UL component recognized; CSA certified.
- Exhaust guards on the top and bottom.
- Rear support brackets.
- Supplied with a 72" power cord with a NEMA 5-15P plug.

Blowers

Packaged Blowers

Packaged blowers effectively cool critical electronic components within an enclosure by means of clean positive air pressure.

- 115 and 230 Volt AC power.
- Permanent washable filter which can be serviced without removing the blower from the rack.
- Operating temperature range: 20°F to 250°F.
- Fan motors are UL component recognized; CSA certified.
- Motor: Shaded-pole, rust resistant shaft, double shielded ball bearings and permanently lubricated.
- Includes exhaust guards and 65% open stainless-steel grille with captive fasteners.

Material

Aluminum:
1/8" Aluminum.

Laminate:
Wood core with
laminated surface.

Solid:
16-gauge steel.

Louvered:
16-gauge steel.

Vented:
16-gauge steel.

Perforated:
16-gauge steel.

For 24" EIA width, change "19" to "24" in part number. Example: XPN-2119-LV becomes XPN-2124-LV.

**Add "U" to the end of the part number for the un-painted version. Example: XPN-2219-A becomes XPN-2219-AU.

Cable Pass Through Panels

Cable Pass Through Panels

Cable pass through panels can be mounted in the front, rear or top opening of a frame allowing cables to enter and exit the cabinet in an organized fashion.

Part Numbers

Name Plates

Name plates provide product or system identification. The name plate consists of an aluminum panel with a 12” length extrusion that can be labeled with a protective insert. Name plates mount to the mounting rail utilizing 1U of the available rack space in a frame. The name plate holder itself is 12” in length for both the 19” and 24” EIA Width versions.

Part Numbers

Plexiglas Panels

Plexiglas® Panels

Plexiglas® panels are designed to provide an attractive solution for closing off open rack units, yet allowing you to see in to view controls or other monitoring devices. The panels are constructed of .236" thick Plexiglas® and mount to the frame's mounting rails via magnetic strips. Choose from two color choices; smoked gray or bronze.

Part Numbers

Single Fan Panels

Single Fan Panel

Single Fan Panels are designed to mount in the top panel opening of a frame.

- 115 Volt AC power or 230 Volt AC Power.
- Fan Motors are UL component recognized; CSA certified.
- 10" diameter fan size with 2 finger guards.
- The life expectancy of the fan @ 104°F is 60,000 hours.
- Operating temperature range: -22°F to +140°F.
- The fan has a Feathered Edge™ blade for better noise control.

XPN-3824-FP-230	1	550	35	230	55	38.500	22U	no

Air delivery based on operating at 60 HZ, single phase power.

Note: When mounted as a top panel, the fan housing assembly extends into the frame opening by 2.06".

Note:

115 Volt includes a 6' power cord with molded 5-15P plug.
230 Volt has no plug.

Pagoda Vents

Available in three types, plain, fan and impeller, pagoda vents assist in proper thermal management of enclosures. Designed to mount on top of the frame, adding 2.27" to the overall height, these vents allow air to exhaust out the top of the cabinet with out taking up any valuable rack space.

Plain Pagoda

Provides air circulation in a populated enclosure.

- Natural Convection.

Fan Pagoda

Provides active air circulation in a populated enclosure.

- 550 CFM, 60 Hz, 55 dBA.
- 115 Volt AC power.
- Fan Motors are UL component recognized; CSA certified.
- 10" diameter fan size with 2 finger guards.
- Operating temperature range: -22°F to +140°F.
- Supplied with a 72" 18/3 SJ power cord with a NEMA 5-15P plug.

Impeller Pagoda

Equalizes static air pressure in a populated enclosure.

- 770 CFM, 60 Hz, 71 dBA.
- 160 W power draw at 60 Hz.
- Fan Motors are UL component recognized; CSA certified.
- 8.86" diameter impeller size, thermally protected.
- Maximum operating temperature is 122°F.
- Permanently lubricated ball bearing motor.
- Static pressure draw of up to 2.6" H2O
- Supplied with a 72" 18/3 SJ power cord with a NEMA 5-15P plug.

Overhead Cable Trays

Overhead Cable Tray

Allows cables to run left to right on top of a cabinet.
Accepts accessory styles A or C.
Use in conjunction with the appropriate filler panel to cover entire top opening.

Part Numbers

Lift Kit
 [Panel: 16-gauge steel]
 [Cross Bars: 18-gauge steel]

Flush Mount Doors

Flush Mount Doors

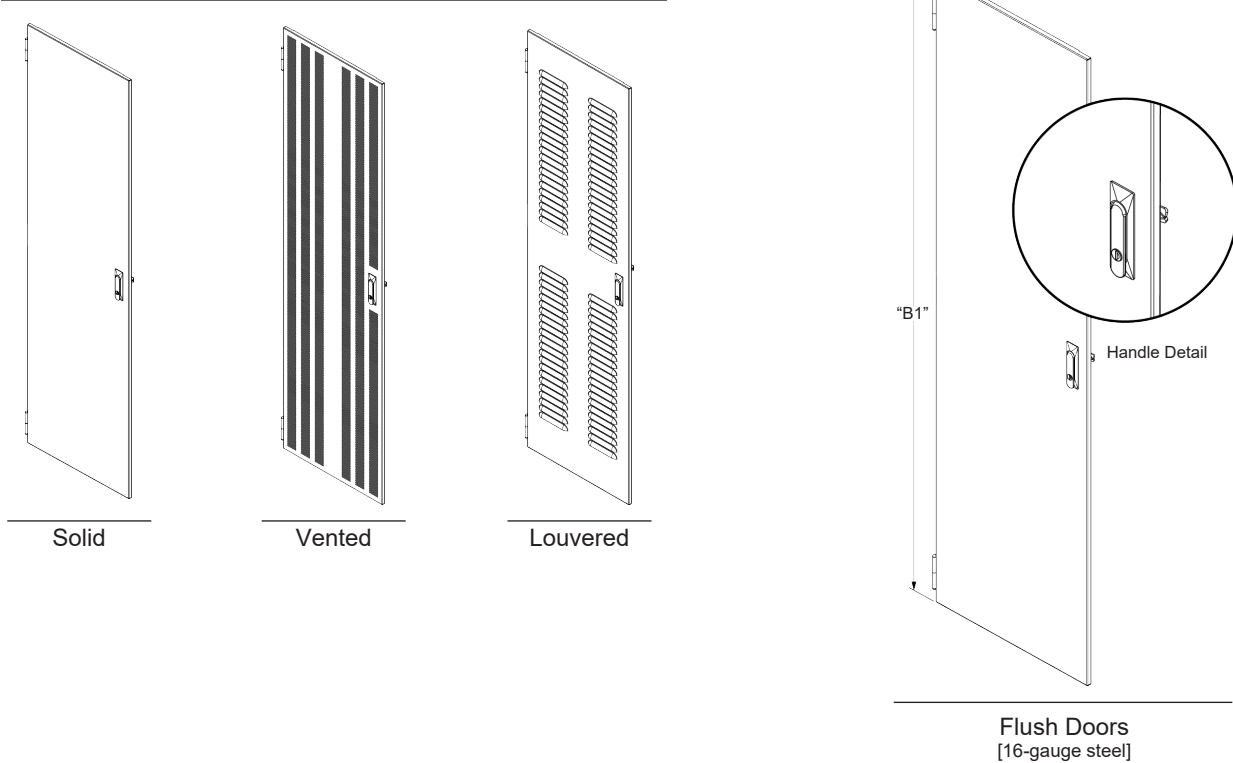

Flush mount doors fit into the vertical panel opening of the frame. The doors utilize the mounting rails for an attachment point. Lift-off hinges, in a stylish black finish, allow for quick removal. The low-profile single point lockable handle provides the security your system may need.

Note Flush doors mount to the front flange of the mounting rails and can fill all or portions of the usable space in the front or rear of a frame. Be aware of possible interference if other rack mount equipment that utilizes the front flange of the rail is used in conjunction with flush mount doors.

How to configure the door part number. Example: DF-HSL-7024

Surface Mount Doors (Steel)

Surface Mount Doors

Surface mount doors cover the panel opening of the frame providing the space necessary to mount equipment and accessories behind the door panel. Available in four styles, the doors feature a low-profile lockable single point latch handle and stylized black hinges that allow for 120° of rotation. When mounted, these doors add 1.00” to the overall depth.

Note The frame must be drilled to accept surface doors, therefore door mounting location must be supplied at the time of order placement.

How to configure the door part number. Example: DS-XPR-6119

Surface Mount Doors (Aluminum Framed Window)

Aluminum Framed Window Doors

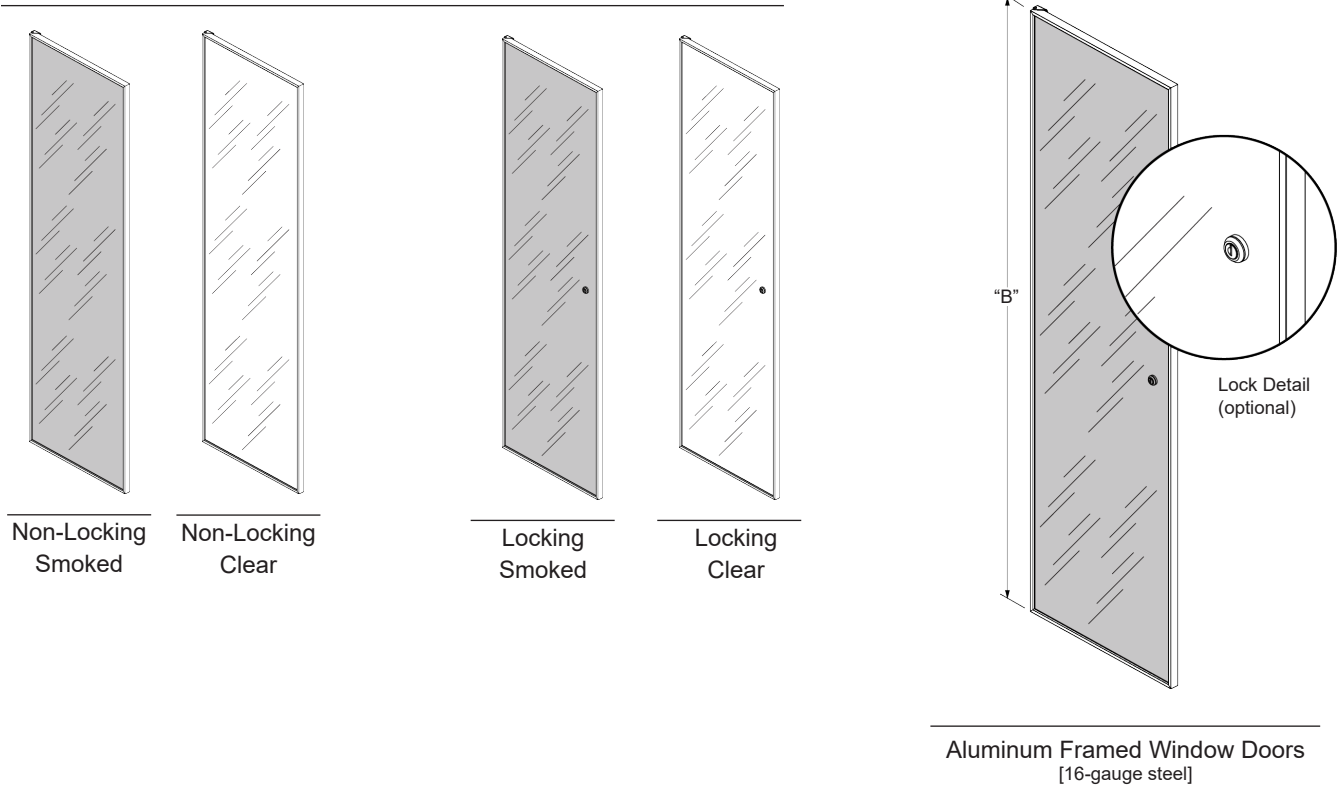

Window doors allow visibility of indicator lights and other operating equipment. The clear anodized aluminum extruded frame is supplied with an 1/8" thick tinted (smoked) plexiglass window panel and a magnetic latching system. The doors are available in either locking or non-locking versions. When mounted, these doors add 1.28" to the overall depth.

Note The frame must be drilled to accept surface doors, therefore door mounting location must be supplied at the time of order placement.

Locking Section View

Surface Mount Doors (Contour)

Contour Doors

Contour doors feature a contour, rather than a flat front, adding a unique aesthetic as well as additional space behind the door for bulky equipment. The door frame is supplied with one of 4 insert options, solid steel, perforated steel, 1/16" thick clear plexiglass or 1/16" thick tinted (smoked) plexiglass. When mounted, these doors add 3.11" to the overall depth.

Note These doors are only available for 19" EIA width frames. The frame must be drilled to accept surface doors, therefore door mounting location must be supplied at the time of order placement.

Side Panels

Side Panel Kit with Articulating Arm Provisions for Vertical Frames 30U - 48U

Each kit contains three panels that fill the opening on the side of a frame. The middle panel (which is installed and secured in place first) has provisions for one articulating arm and a hole with a grommet to route cables. The top and bottom panels can then be removed from the outside; independent of each other. Formed tabs lock the side panels into place at the bottom while external fasteners near the top secure the panels in place. Select from one of three fastener choices. Articulating arm and fasteners sold separately.

Side Panels

Side Panel Kit with Track Style Articulating Arm Provisions for Vertical Frames 30U - 48U

Each kit contains a panel and a track that fill the opening on the side of a frame. The track comes with a mount for one articulating arm. There are grommet holes above and below the track to route cables. Due to how the track is installed, it allows the side panel to be removed from the outside; independent of the track. External fasteners near the top of the panel secure it in place. Select from one of three fastener choices. Articulating arms, additional mounting brackets, and side panel fasteners sold separately.

Keyboard and Monitor Articulating Arm Combo

This arm incorporates both a keyboard tray and monitor mount in one. The mounting bracket is included. The bracket has off-set holes for left or right side mounting so as to not infringe on removable panel. This keyboard and monitor combo is black in color and can support up to 40 lbs.

Monitor / Keyboard Combo

ERGO-230-200-CA

40 lb. Capacity

Side Panels

Side Panels for 26", 31", and 36" Deep Vertical Frames

Available in solid or vented versions, these side panels can be removed from the outside of the frame after it has been populated. Formed tabs lock the side panels into place at the bottom while external fasteners near the top secure the panel in place. Select from one of three fastener choices, sold separately.

Side Panels for 42" and 47" Deep Vertical Frames

Available in solid or vented versions, these side panels can be removed from the outside of the frame after it has been populated. Formed tabs lock the side panels into place at the bottom while external fasteners near the top secure the panel in place. Select from one of three fastener choices, sold separately.

Due to the large surface area, 42" and 47" deep side panels for vertical frames have been split in half. By ordering one part number you get two panels and the side panel channel. For this reason, these side panels require 4 fasteners per side.

		Part Numbers	Description	Where Used
Mounting Panels, Electronics and Other Equipment		HW-092 (AHWX-092-003219)	#10-32 Clip Nut	Use when mounting 5/8" or 1/8" thick filler/closure panels or other rack-mountable equipment/electronics to thru hole mounting rails. Use with HW-103, HW-104, HW-303 or HW-304 panel screws.
		HW-104	#10-32 x .500" Panel Screw	Used when mounting 1/8" thick filler/closure panels or other rack-mountable equipment/electronics to tapped mounting rails or in conjunction with clip nut HW-092 on thru-hole rails. Comes with polyethylene washer.
		HW-304	#10-32 x .500" Panel Screw - Black	Used when mounting 1/8" thick filler/closure panels or other rack-mountable equipment/electronics to tapped mounting rails or in conjunction with clip nut HW-092 on thru-hole rails. Comes with polyethylene washer.
		HW-103	#10-32 x 1.125" Panel Screw	Used for mounting 5/8" formed filler/closure panels or other rack-mountable equipment/electronics to tapped mounting rails or in conjunction with clip nut HW-092 on thru-hole rails. Comes with polyethylene washer.
		HW-303	#10-32 x 1.125" Panel Screw - Black	Used for mounting 5/8" formed filler/closure panels or other rack-mountable equipment/electronics to tapped mounting rails or in conjunction with clip nut HW-092 on thru-hole rails. Comes with polyethylene washer.
		HW-110	#10 self-tapping screw "A" threads.	Used for mounting laminated filler/closure panels.
		HW-1032	#10-32 Panel Stand-off	Used for mounting 1/8" thick filler/closure panels to bring them flush with front of frame. Use with HW-154 keps nut and HW-104 or HW-304 panel screws.
Joining Frames		XJK-LO-HI	Joining Kit	Used to join two different height vertical frames side by side. Kit consists of Joining Clip, Clip Nut and Screw.
		XJCX-F10-000000	Joining Kit	Sold in pairs. Used to join vertical or slope front frames side by side. Kit consists of Joining Clip, Clip Nut and Screw.
		AJCX-HDX-000100	Joining Kit	Sold in pairs. Used to bolt turret frames to a vertical or slope front frames. Kit consists of Joining Clip, Clip Nut and Screw.
Lift Kits		AHWX-272-161637	3/8-16 Lift Eye	Part of the lift kit assembly. Use with AHWX-510-000037 lock washer and AHWX-022-201637 hex head screw.
		AHWX-510-000037	3/8 Lock Washer	Part of the lift kit assembly. Use with AHWX-272-161637 lift eye nut and AHWX-022-201637 hex head screw.
		AHWX-022-201637	3/8-16 x 1-1/4" Hex Head Screw	Part of the lift kit assembly. Use with AHWX-272-161637 lift eye nut and AHWX-510-000037 lock washer.
Other		AHWX-110-220016	Floor Tie Down Spacer	This spacer is used when bolting a frame to the floor. The spacer is placed between the frame or corner gusset plate and the floor before the tie down bolt is applied.
		AHWX-192-002025	1/4-20 Clip Nut	Used for mounting plinth (pontoon) bases to frames with AHWX-722-102025 screw.
		AHWX-722-102025	1/4-20 x 5/8" Screw	Used for mounting plinth (pontoon) bases to frames with AHWX-192-002025 clip nut.

Work Surface Hardware

Work Surface Support Hardware

The following hardware is supplied with all work surfaces. These parts do not need to be ordered separately unless there is a unique application that requires you do so. The Top Adapter Panel requires a color choice while the balance of the support hardware is provided in a black finish.

These parts fit together in the following manner:

- The Top Mounting Brackets are bolted securely to the inside legs of the mounting rails directly behind the work surface.
- The Top Mounting Brackets support the work surface by holding the Top Bar Supports which are fastened to the One-piece Top Angle mounted to the underside of the work surface.

Note

If protection is required around the cable access cutout in the top adapter panel, grommet material can be ordered as an optional item under part number GMT-0012. Each cutout requires 1' of material. (Sold by the foot)

Emcor Product Portfolio

Cabinets and Enclosures

This standard product lineup includes a range of vertical racks and cabinets, which can be configured or modified with numerous accessories and sizes to meet your diverse needs.

ESQ®

10 Series®

Seismic

Data Center

Consoles and Workstations

This standard product lineup includes a range of modular security consoles and workstations that can be configured to meet the space constraints of any room.

FP1

FP2

ESQ®

Air Traffic Control

Custom Solutions

For those needs that fall outside of Emcor's standard products, we can build completely custom solutions to meet the needs of any customer.

Outdoor Enclosures

Cages

Air Conditioned
