

Put your monitor on an arm.

# Free Up Valuable Rack Space

Mounting Bracket can be easily repositioned at any height along the track.

## DON'T SEE IT? CUSTOMIZE IT.

If you don't see what you need, we can make a custom bracket to mount the monitor arm of your choice.

### Track Style Side Panels for 30U - 48U 10 Series Frames

Based on the size of the frame, choose a side panel with a track for mounting articulating arm(s). Each kit contains a panel and a track that fill the opening on the side of a frame. The track comes with a mount for one articulating arm. There are grommet holes above and below the track to route cables.

Due to how the track is installed, it allows the side panel to be removed from the outside; independent of the track. External fasteners near the top of the panel secure it in place. Articulating arms, additional mounting brackets, and side panel fasteners sold separately.

Kit can be retrofit to mount to frames currently in the field.
