CompuDesk® Gen2
Modern Electronic Workstation

The flagship workstation, redesigned with updated features and configurations that enhance durability, modularity, and modifiability.

Modern Electronic Workstation

CompuDesk® Gen2

The CompuDesk® Gen2 is a redesign that enhances the most practical and valuable features from its predecessor and delivers increased functionality through thoughtful development. The Gen2 features a few material upgrades, including a new desktop surface that includes a PVC band which lines the edge of the workspace surface and is color coordinated with the customer's laminate color, improving durability and aesthetics.

Emcor's CompuDesk® Gen2 includes improvements to both the electronic (rack-mounting) and utility (drawer) pedestals. The new utility pedestals have added handles and locks for storage access and security. Electronic pedestals are available with new cable management solutions that can augment the integrated cable routing throughout the desk's tubed architecture. Design improvements in the channels underneath provide more thorough access to cables and accessories for more streamlined workflow capabilities.

Clamp Style Mount
NOTE: This mount requires a square edge to clamp to.

Part Number
HS-B-G

Grommet Style Mount
NOTE: This mount requires a grommet hole to be drilled in the work surface.
Mounting Base options for Articulating Arms

The following base options can be used in conjunction with a work surface or frame to mount an articulating arm to. These base options accept monitor arm configuration that come with a pole. All mounting hardware is included.
Heavy Duty Mount - All In One

The following option can be used to support monitors weighing up to 20 lbs. This set-up includes the grommet-style mount and does not require a mount to be ordered separately.

Part Number
HS-G1-AD-M8

Accessories

CompuDesk® Gen2 is built on the original Series III architecture, extending the pedestals down to the ground for increased stability, storage, and rack-mounting space.
The workstation's redesign encourages modular monitor installation with both clamp-on and grommet-mounting capabilities. Plug-in strips and grounding bus bars can be easily added on with embedded accommodations. The workstation is compatible with all ESQ® accessories and has a 600 lb. topside load rating.

Standard Configurations

The CompuDesk® Gen2 aims to provide the most value in a workstation by giving our customers the ability to tune up the COTS offering with as many features as necessary to satisfy their unique requirements. Convenience, functionality, and survivability were integral to the engineering redesign and we're excited to breathe new life into an old fan favorite.

The CompuDesk® Gen2 can be modified in any dimension or can be manufactured from alternate materials for improved signal control. Should our standard configurations prove insufficient for your application, contact Emcor to inquire about finding the right product to meet your specifications.
